EDUCATION

Kungliga Tekniska Högskolan <i>M.Sc. Computer Science, Track: Data Science / Machine Learning</i> - Cumulative GPA: 4.8/5.0 - Thesis: Hierarchical Control of Multi-Agent Game Environments	Stockholm, Sweden <i>Aug 2025 — expected: Jun 2026</i>
Friedrich-Alexander-Universität <i>B.Sc. Computer Science</i> - Cumulative GPA: 4.5/5.0 Top 13% of graduates - Thesis: Narrative Representations in LLMs Co-authored in paper - Study Abroad: - Universitat Politècnica de Catalunya, Barcelona, Spain (Feb 2024 - Jun 2024) - Umeå Universitet, Umeå, Sweden (Aug 2022 - Jan 2023)	Erlangen, Germany <i>Oct 2020 — Mar 2024</i>

WORK EXPERIENCE

Master Thesis Intern Electronic Arts - SEED - Researching novel architectures combining LLMs and Reinforcement Learning for more intelligent game agents - Implementing a hierarchical control system in Unity to bridge high-level reasoning (LLM) with low-level control (RL) - Benchmarking hybrid model performance against baselines in multi-agent game environments	Feb 2026 — Jun 2026 <i>Stockholm, Sweden</i>
Machine Learning Engineer Intern Hypertype - Developed an NLP pipeline performing sentiment analysis on customer data to measure user satisfaction - Built and deployed an analytics dashboard in Flutter enabling product team to track product KPIs - Collaborated directly with founders to translate analytical findings into potential product improvements	Sep 2025 — Dec 2025 <i>Stockholm, Sweden</i>
Software Engineer Intern Concedus - Planned and implemented client-facing IT solutions including secure authentication workflows in React - Supported IT security audits by analyzing system architectures and identifying compliance risks	Feb 2023 — Jan 2024 <i>Nuremberg, Germany</i>
Research Assistant Fraunhofer IIS - Contributed to 3D scene reconstruction pipelines from image data using Neural Radiance Fields (NeRF) - Evaluated model performance under real-world conditions to identify practical limitations	Mar 2022 — Aug 2022 <i>Erlangen, Germany</i>
Teaching Assistant FAU Erlangen-Nürnberg - Assisted teaching courses in Mathematics and Digital Technology - Led tutorials and exercise sessions; provided feedback on assignments	Oct 2021 — Feb 2022 <i>Erlangen, Germany</i>

PROJECTS

Hackathons - LYNX 2025: Awarded 1st place for developing a quantitative trading strategy using financial time-series data - Norrskan Fixathon 2025: Built a drug repurposing tool using Tahoe cell embeddings to identify lung cancer treatments - Junction 2025: Developed an AR prototype for migraine relief using Snapchat Spectacles - HackUPC 2024: Received honorable mention for building a fashion recommendation tool with similarity modeling	
Cedge - Co-developed AI-powered competitive intelligence software analyzing public competitor data - Worked in a multidisciplinary student team translating business needs into technical solutions - Pitched product concepts to stakeholders during accelerator programs	Apr 2023 — Jan 2024

SKILLS & INTERESTS

- Tech-Stack:** Python, Flutter, SQL, TypeScript, C#, Java | PyTorch, Scikit-learn | Git, GCP, Unity, Docker
- Interests:** Sports (Running, Cycling, Swimming) | Language Learning (Swedish, Spanish)
